

From Our  
Agricultural Range  
**Especially For  
'Birds & Poultry'**

Priding itself on top quality, effective products that you can trust at affordable prices, Barrier Animal Healthcare leads the field for providing wholly different solutions to animal health and hygiene. Specialising in a range of entirely natural, non-irritant healthcare products that are not only effective, but are kind to the animal, the user and to the environment.

Barrier Animal Healthcare's Agricultural range of healthcare products is **suitable for use in Organic Farming Systems**, falling into the exempt category of products which use only plant oils as active ingredients, as listed in Annexe IIB (Pesticides) of Council Regulation (EEC) No 2092/91 (as amended). All repellents are fully **HSE Approved and Licensed**.

Barrier Animal Healthcare also manufactures over 30 products for Cattle, Sheep, Horses and Small Pets which includes 'Barrier H' agricultural herbicide for the all year round control of ragwort.

Choosing the right products for you and your animals can be an absolute nightmare with the options on offer, but we feel confident that once you have tried our range of products there will be no turning back.

*Working with Nature*

## Parasite Control

### Red Mite Powder

**HSE Approved – Licence No: 8710**  
Available in 5K bucket and 500g shakers.

&

### Red Mite Concentrate

**HSE Approved – Licence No: 8719**  
Available in 5L & 500ml.

Effective repellent combinations to be applied directly to birds and poultry as proactive 'on bird' deterrents to infestation or to rectify an existing problem.

**Red Mite Powder** is kind, gentle and specifically designed to be applied directly to all birds. Its slow release formulation lasts for up to six weeks depending on weather. Put plenty on and repeat as necessary.

**Red Mite Concentrate** is for knapsack application directly onto the birds.

Dilute contents of container in one go:

*For ongoing maintenance* – 1:50 parts water.

*Where infestation exists* – 1:20 parts water. Repeat every 5/7 days, until on top of the problem and then use as an ongoing maintenance, every two/three weeks.

Do not use in conjunction with chemical based products, as this will render natural products useless.

## No More Scaly Leg

Scaly Leg Mite cause pain and intense irritation for the bird as they burrow under the scales and into the skin of the legs and sometimes the comb and wattles. Check for the tell tail signs of crusty, white deposits on enlarged, rough and lumpy legs where the scales have become raised.

**NEW Scaly Leg Ointment** Intense Action  
Available 400ml tub.

Suffocates mites by physical means, whilst soothing, calming and giving instant relief against irritation. Will not taint eggs.

### Scaly Leg Spray

**HSE Approved – Licence No: 8842**

Available 500ml trigger spray.

Effective deterrent against scaly leg mite. Scaly Leg Spray repels mite, whilst soothing and calming irritation.

Will **NOT** taint eggs.

Suitable for use in Organic Farming Systems.  
Use regularly for ongoing maintenance and where infestation exists.

### Anti-Pecking Spray

DETERRENT AGAINST FEATHER PECKING

Available 400ml trigger spray.

A totally natural, non-toxic, foul tasting spray designed to help deter feather pecking in poultry, which can be the first step towards cannibalism.

Feather pecking in poultry flocks is usually directed to the vent area, tail, body, feet and head and can range from gentle feather pecking to a very aggressive form. Unfortunately, poultry are attracted to blood and so the slightest fresh wound that bleeds can lead to cannibalistic behaviour, where the tearing and consuming of tissue, skin and organs can take place.

## Especially for Poultry Housing

### Barrier Red MiteX Concentrate

Available in 5L & 500ml

#### ONE SMALL 500ML BOTTLE PRODUCES 10L OF TREATMENT.

A totally different approach to the control and eradication of Red Mites in Poultry Housing, with a high dilution rate.

**Barrier Red Mite X Concentrate** gives excellent cleaning, anti-bacterial results in Poultry/Animal Housing and also disinfects. The unique formulation has added benefits in controlling Red Mite and other Blood sucking/Biting pests. It controls Red Mite using a physical mode of action. The formulation has a slightly sticky consistency which when applied directly to insect pests, breaks down the wax coating causing dehydration and death. A similar reaction is caused when applying to Red Mite eggs.

**Barrier Red Mite X Concentrate** is non-toxic and safe to use around feed areas, egg layers and foodstuffs. Suitable for use in Organic Farming Systems.

Return poultry to the treated area once the area is dry.

Red Mite blood suck from birds and if they are not controlled with a suitable insecticide, they can cause anaemia and even death in poultry.

## Disinfectant

### Barrier V1 - Concentrate.

Available in 20L, 5L & 1L

#### FAST TURNAROUND, WHERE IMMEDIATE ACCESS AND RE-STOCKING IS NECESSARY.

Keeping housing/sheds/stables free from bacteria and nasty odours is always an up-hill task, but help is to hand. Designed especially for use in intensive farming, this product contains only concentrated plant derivatives that are entirely non-toxic – even in concentrated form.

High dilution rate of 1 to 40 parts water.

Kills bacteria.

Neutralises odours.

Reduces ammonia levels.

Independently tested at 1:40 parts water against a wide range of organisms. Has an effective kill rate against a wide range of bacteria including all types of Salmonella, E Coli, Listeria monocytogenes and Aspergillus.

Apply manually through a knapsack sprayer, pressure washer, orchard sprayer or similar, to all internal structures, walls, ceilings, floors and posts.

## Especially for Pigeon Lofts

### Barrier MiteX - Disinfectant Wash

Available in 150ml (Concentrate)

A 100% natural disinfectant specifically designed for use in pigeon lofts to destroy Bacteria, Mould, Yeast, Fungi and eliminate irritating problems.

Manufactured using only concentrated plant derivatives that are entirely non-toxic, even in concentrated form.

High dilution rate of 1 to 50 parts water.

No re-entry time restriction.
